

Many-sided!

"The great news about the T5 scrubber-dryer is the fact that it is usable in a versatile of applications. Now we can use one machine for cleaning in our commercial as well as in our industrial environments. The cleanable tanks make it suitable for cleaning in applications where hygiene is required and with the cylindrical scrub system and extra down-pressure it also cleans warehousing and distribution facilities with ease. This machine is so many-sided!"

Benefits

- Fitted with FaST - Foam Scrubbing Technology
- Innovative cleanable tanks
- Up to 5 hours of runtime
- Unmatched manoeuvrability
- Disc or cylindrical scrubbing

Tennant Company offers the most complete line of floor and surface maintenance equipment & solutions, brushes and cleaning detergents in the world. Our sales and service network provides you with integrated custom-made cleaning solutions (including rental and leasing programs) to meet any floor care need. Our service offering consists of several preventive maintenance programs, all with the same goal; maximum cleaning performance, minimal cleaning costs per square meter and maximised machine uptime.

Creating a cleaner, safer world™

T5 - The versatile mile...

1 tablespoon of water per m²

T5 added value

- FaST-technology
- cleanable tanks
- intuitive one-touch controls
- high manoeuvrability
- excellent water pick-up
- low sound level
- long runtime
- high productivity
- large savings on labour, water and detergent

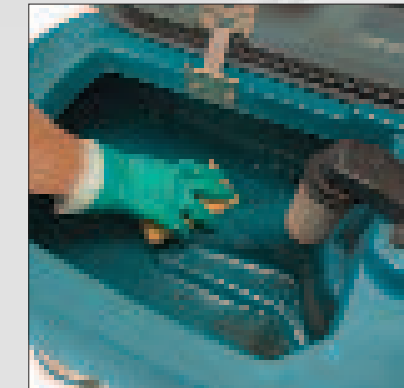

Unmatched manoeuvrability

Modern, intuitive one-touch controls combined with unmatched manoeuvrability allow the operator to achieve maximum results and minimise user fatigue. Ergonomic, simple controls minimise training time; easily adjusted brush pressure settings and memorised last used settings.

Innovative cleanable tanks

Longer lasting battery pack

Ergonomic, one-touch controls

A mid sized walk-behind scrubber-dryer which fits in the line of T-series automatic scrubber-dryers: the pioneering T5. Drawing on FaST-technology, the T5 uses water so sparingly, a little more than 1 tablespoon of water is needed to clean 1 m². The T5 is equipped with cleanable

tanks, intuitive one-touch controls, unmatched manoeuvrability, long-lasting battery packs, on-board charger and with the addition of the cylindrical scrub option prepared for cleaning in traditional industrial markets. T5: ideal for use in retail environments, warehouses, educational facilities, hospitals, airports, distribution centres and logistics applications.

FaST - Foam Scrubbing Technology

Tennant's FaST self-collapsing foam is the biggest scrubbing breakthrough in decades, giving you extremely low water consumption. The T5 keeps you going up to 4 times longer on that one tank of water.

Cleaner than clean

With its cleanable tanks, the Tennant T5 allows you to improve the hygiene of your working environment even further. All corners of the tanks can be accessed for thorough cleaning. This unique feature lets the T5 set the new standard for optimal hygiene.

Powered to keep you going

Thanks to a powerful battery-supply the T5 provides up to 5 hours of runtime. This ensures you an optimal cost in use. An on-board charger can provide you extra flexibility.
